PROFESSIONAL SUMMARY

Python developer and Computer Engineering student with hands-on experience in backend logic, OOP, JSON workflows, and data processing. Skilled in building modular systems, solving real-world operational problems, and developing automation solutions. Completed two technical internships in backend development and data science, gaining exposure to structured problem-solving and analytical thinking.

SKILLS

Backend: Python, OOP, JSON, Basic DSA, REST Logic (Basic)
Data: Pandas (Basics), NumPy (Basics), Data Cleaning, EDA (Beginner)
Tools: VS Code, Jupyter Notebook, Google Colab, Windows CMD, Bash
Other Skills: Problem-Solving, Analytical Thinking, Team Collaboration, Leadership

WORK EXPERIENCE

Technical Lead – Tipper Project **Sep 2025 – Oct 2025**

- Designed and implemented a complete **Tipper Lifecycle Management System**, covering factory dispatch, showroom workflow, owner delivery, and maintenance operations.
- Built the **Factory → Showroom workflow** to automate vehicle intake, insurance status checks, and movement tracking using Python and JSON.
- Developed a **role-based registration system** for Manager, Owner, Driver, and Blue-Collar workers, structured using OOP for modularity.
- Implemented the **Showroom → Owner delivery module**, enforcing mandatory insurance compliance and reducing delivery errors.
- Created a **mechanic maintenance module** enabling repair logs, service scheduling, and vehicle health updates.

Virtual Data Science with Python Apprentice Intern **Nov 2025**

Yuva Intern (NSDC)

- Completed foundational training in Python for data analysis, dataset cleaning, and exploratory processing.
- Utilized Pandas and NumPy to perform data manipulation and generate insights from structured datasets.
- Automated small analytical scripts to streamline repetitive data-processing tasks.
- Practiced beginner-level EDA and visualization techniques for real-world sample tasks.

PROJECTS

ATM Machine | Python, OOPs
• Developed an ATM simulation with deposit, withdrawal, and balance inquiry features.
• Applied OOPs concepts to manage accounts and transactions securely.
• Improved reliability with PIN authentication and input validation.

Bus Tracking & Fee System | Python, JSON
• Built a system to manage student bus routes and fee payments with JSON storage.
• Automated route allocation and payment tracking, reducing manual errors.
• Improved efficiency of record-keeping for transportation and student payments.

Coaching Classes Management System | Python, OOPs
• Designed a tool for enrolment, attendance, and fee tracking.
• Applied OOPs for modular design of students, teachers, and schedules.
• Reduced manual workload by automating record maintenance.

EDUCATION

Bachelor of Engineering (Computer Engineering)

Pillai HOC College of Engineering, Raigarh
CGPA: 6.48 | Expected Graduation: June 2028

- **12th Grade:** Sudhagad Education Society, Kalamboli – 64%
- **10th Grade:** New English School, Kalamboli – 86%

CERTIFICATES

- **Python Language Certificate – TechSpace**
- **Internship Certificate – TechSpace (Technical Lead, Tipper Project)**
- **Internship Certificate – NSDC (Data Science Apprentice)**
- **Cybersecurity Basics – Mahindra Foundation**
- **TCS iON Career Edge – Young Professional**
- **Data Scienpce Basics – Scaler**
